

Welcome to

The Nordic Lipidforum

The Nordic Lipidforum was formally founded in 1969 as a professional Nordic arena for lipid science and knowledge exchange in the five Nordic countries; Denmark, Finland, Iceland, Norway and Sweden.

Our mission is the furthering of lipid science and technology and the cooperation and exchange of ideas between scientists and technologists at a Nordic level.

Key points in the Nordic Lipidforum activities are to:

- Organize a contact network for a Nordic collaboration in the lipid area
- Promote applied research and technology for industrial application of lipids, fats and oils with a special focus on the Nordic raw materials such as fish and other marine oils, rapeseed, camelina and flaxseed oil
- Provide an information network playground for Nordic and international meetings, job opportunities in academia, research institutes and/or industry etc.
- Provide a forum for exchanging of ideas and information
- Increase international visibility of Nordic research and industry in the lipid field
- Inspire talented employees to increase their competence in lipid science and development

Membership structure and fees

The following membership structure is valid from January 1st 2015:

- All members employed in a company have to be a company member
- Every company has to register all active persons as members of the Nordic Lipidforum, only registered persons are able to achieve membership benefits
